Accounting Estimates

Management uses estimates and assumptions in preparing financial statements in accordance with accounting principles generally accepted in the United States of America. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that were used.

Revenue Recognition

Sales are recorded as income when the products are received and accepted by the customers.

Inventory

Inventory is stated at the lower of cost (determined by the first-in, first-out method) or net realizable value. Inventories are adjusted for obsolescence and are written down to net realizable value based upon estimates of future demand, technology developments, and market conditions.

Property and Equipment

Property and equipment are stated at cost. Major renewals and improvements are charged to the asset accounts while replacements, maintenance and repairs, which do not improve or extend the lives of respective assets, are expensed. At the time property and equipment are retired or otherwise disposed of, the assets and related depreciation accounts are relieved of the applicable amounts. Gains or losses from retirements or sales are credited or charged to income.

The Company depreciates its property and equipment for financial reporting purposes using the straight-line method based upon the following useful lives of the assets:

Website	3 Years
Furniture	5 Years
Equipment	3 Years

Common Stock Issued for Non-Cash Transactions

It is the Company's policy to value stock issued for non-cash transactions, such as services, at the fair market value of the goods or services received, or the consideration granted, whichever is more readily determinable, at the date the transaction is negotiated.
